

They last and last and last.

The new GEKA® plus watering device soft rain “comfort”.

High flow rate
More water gets the job done faster: The watering device enables an extremely high flow rate of water. This significantly reduces the amount of time required for watering.

Ergonomic design
for fatigue-free work

Thermally-insulated handle
with a soft grip cover for a comfortable feel – which is easy to grip even with dirty hands.

GEKA® plus quick coupling
suitable for hose sizes from 3/8" to 1 1/2".

Locking lever
for full power when in continuous operation.

Handle valve
for comfortable operation and precise dosage.

Outlet pipes
available in four different lengths: 40 cm, 60 cm, 90 cm and 120 cm.

Bayonet catch
makes changing the watering head easy with just a click.

Removable plate
which makes it easy to clean or change.

Rubber protection ring
to protect your product from damage.

Wide range of compatible GEKA® plus watering and spray heads
the right tool for every watering application.

Versatile, convenient and extremely durable: Our 2017 watering devices last once again, just as the GEKA® name promises. Inside and out they are almost completely made of high quality metal. The high material and manufacturing quality makes them extremely durable – the best conditions for a decade of operation. The new GEKA® plus watering device soft rain “comfort” offers exceptional comfort. Its high-quality robust handle valve guarantees not only comfortable handling, but also very precise dosage.

The new GEKA® plus watering devices: Made for professionals. And for everyone who likes to water their garden like a professional.
